artistically designe

In the 21st century the digital world of the fashion industry demands the social media that they use did not control not only the way people dress but also how to have more things, making fashion and people's social activities. In the 21st century did not only wear clothes and shoes, it covered up the whole world of a generation, and this is our main production today.

Therefore, fashion is both art and design and this reflects a complete generation that is not afraid to say what they think, in other words they want. Fashion is not just a means of clothing your body, it's the means of your personality and lifestyle, and designers are well aware of the power they hold. Designers, producers and designers in the fashion sector are more likely to understand their own roles within the market.
