*Style is always in fashion.*  
A variation of the process where in which  
the silk worms are allowed to loose before the cocoon  
are reared in boiling water to soften the silk,  
and then the fibres are reeled. Single shelled,  
multi-shelled cocoons are collected and then boiled to extract the silk yarn.  
Reeling is a very important part in the manufacturing of silk.

*the next important.*

A vital part of the process made in which  
the silk worms are allowed to spin before the cocoons  
are washed in boiling water to soften the silk  
and then the fibres are reeled, straightened  
and strand cocoons are collected and then boiled to remove the outer  
covering is a very important part in the manufacturing of silk.
