Style is always in fashion.
A variation of the process where in which
the silk worms are allowed to loose before the cocoon
are reared in boiling water to soften the silk,
and then the fibres are reeled. Single shelled,
multi-shelled cocoons are collected and then boiled to extract the silk yarn.
Reeling is a very important part in the manufacturing of silk.

the next important.

A vital part of the process made in which
the silk worms are allowed to spin before the cocoons
are washed in boiling water to soften the silk
and then the fibres are reeled, straightened
and strand cocoons are collected and then boiled to remove the outer
being in a very important part to the manufacturing of silk.
